Valdas STONKUS

Resume

Summary

Until now, I worked in the business sector - I designed logistics warehouses.
At the moment, I am changing the profession to that of a programmer. For the last two years I was learning programming intensively, but the interest in the field was leading me many years before.

Academic achievements

I graduated from the Faculty of Economics of Šiauliai University with a bachelor's degree.
I completed the 7-month Front-end program of the Baltic Institute of Technology (BIT).
Learning programming went very well, I was one of the best participants in the group.
I passed almost all the tasks with the maximum result, in the final part of the BIT program I collected 96 out of 100.

Skills

I have mastered the basics of the following programming languages, libraries and frameworks:

- *JavaScript*
- *ReactJs*
- *NodeJs*

- *Python*
- *VueJs*
- *Git*

- *HTML*
- *CSS*
- *SASS*

I have a lot of experience in business B2B, logistics and customer service sectors.

Projects

„Warfarin Dose Calendar" *– blood coagulability regulator of the dosage of the drug calculator.* React, Bootstrap, NodeJs API

"Community blog" *– teamwork using Jira Kanban's methodology*. React, NodeJs, SASS, Storybook, Contentful

Stonkus.lt *– personal portfolio*. Vanilla JavaScript

„Flight Crawler" *– the app pulls out the cheapest round trip flights based on selected airports*. Python

More of my work on GitHub.

Why am I suitable for this job offer

I have the basics of programming, I work in a team, I know how to solve problems that have arisen. I do not stop learning, I am constantly interested in "untouched" topics. I have experience in business and I have a good understanding of business relationships. I am ready for challenges and am a potential employee of your company.
